About this course

Prerequisites

- Successful Azure network engineers should have experience creating and managing compute, storage, and networking resources in Azure.

Azure Network Engineer Role

- Network engineers have subject matter expertise in planning, implementing, and managing Azure networking solutions. This includes core network infrastructure, hybrid connectivity, application delivery services, private access to Azure services, and network security.
- As an Azure network engineer, your responsibilities include optimizing performance, resiliency, scale, and security of Azure networking solutions. You deploy the solutions by using the Azure portal, the command line, and templates. You proactively monitor network environments to identify issues and minimize risk.

AZ-700 Agenda

Module 01: Introduction to Azure Virtual Networks

Lab
Peering VNet Routing

Module 02: Designing and Implementing Hybrid Networking

VPN VWAN

Module 03: Designing and Implementing Azure ExpressRoute

ER

Module 04: Load balance non-HTTP(S) traffic in Azure

LB Traffic Manager

Module 05: Load balance HTTP(S) traffic in Azure

App GW WAF Front Door + CDN

Module 06: Design and Implement Network Security

FW DDOS

Module 07: Design and Implement private access to Azure Services

Module 08: Design and Implement Network Monitoring

Monitor KQL Watcher

AZ-700 Agenda

Module 01: Introduction to Azure Virtual Networks

Module 02: Designing and Implementing Hybrid Networking

Module 03: Designing and Implementing Azure ExpressRoute

Module 04: Load balance non-HTTP(S) traffic in Azure

Module 05: Load balance HTTP(S) traffic in Azure

Module 06: Design and Implement Network Security

Module 07: Design and Implement private access to Azure Services

Module 08: Design and Implement Network Monitoring

Let's get to know each other

- Your name
- Company affiliation
- Title/function
- Your experience
- Your expectations for the course

Let's have a great time together

We all contribute to a great class

9⁰⁰ - 17⁰⁰

Get the most out of your Microsoft Learn profile

Verify, track, and share your training and certification progress and accomplishments—all on one platform

- Claim your achievement code for this course and share you have completed it.
- Access your course material and track progress on your learning activities.
- Share and verify your Microsoft Certifications via email, on social networking platforms, and on your résumé.
- Download and print transcripts and certificates.
- Manage your upcoming activities and certification exam appointments.

Create your Microsoft Learn profile at learn.microsoft.com

Access your course materials

All course content is available on Microsoft Learn

- We'll go through this content together and as the course progresses, I will advise you on which modules to review.
- You can provide feedback for modules on Microsoft Learn. Use the link at the bottom of the page.
- Detailed lab instructions are included in your lab environment.

AZ-700 Designing and Implementing Microsoft Azure Networking Solutions

9 hr 27 min • Learning Path • 8 Modules

9800 XP

Intermediate Administrator Network Engineer Application Gateway DNS ExpressRoute Firewall Firewall Manager
Front Door Load Balancer Network Watcher Private Link Traffic Manager Virtual Network Virtual WAN VPN Gateway

Learn how to design and implement a secure network infrastructure in Azure and how to establish hybrid connectivity, routing, private access to Azure services, and monitoring in Azure.

Become Microsoft Certified

92%

of certified IT professionals feel more confident
in their abilities after earning certifications¹

Get recognized by earning industry validation for technical knowledge. Ensure you stay current with the necessary skills and expertise for continued success.
